

Introducing the fastener custom-made for our trim.

You're probably familiar with the Cortex® Fastening System for cellular PVC trim. It eliminates the need for caulking, sanding and painting nail holes.

Now it's been engineered

specifically for Ply Gem Trim and Mouldings. In

fact, the plugs are made from actual Ply Gem trim products so they match perfectly.

Replacing Wood For Good™

Fastens faster.
Holds stronger.
Looks better.

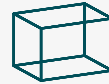

With the new Cortex Fastening System from Ply Gem, builders and remodelers can install our cellular PVC trim products in less time with plugs that match perfectly.

- Saves up to 35% installation time
- No need to caulk, sand and paint every nail hole
- No need to pre-drill holes
- Setting tool places fastener at correct depth every time
- Threaded fasteners provide a stronger hold than nails
- Plug is made from Ply Gem Trim product for a perfect match
- Plug is guaranteed to stay in place for the life of the project
- Available in smooth or wood grain finish
