

ClipStone Sizing Specifications

Ledgestone Information

- Ledgestone flats are manufactured in 4" tall pieces with lengths from 6" up to 17" for ease of installation
- Ledgestone corner pieces come in lengths of 8"-10"
- There are approximately 3.5 pieces per square foot of stone
- Stone weighs approximately 13 lbs per square foot
- Corners weigh approximately 12 lbs per linear foot
- There are three corner pieces per linear foot
- Installation will require roughly 7 screws per Square foot
- Screws are recommended to be #8 Galvanized (1.25" length) per our installation instructions

ProStack Information

- ProStack flats come in 4" high pieces with lengths from 8" to 16"
- ProStack corner pieces come in lengths of 8"-10"
- There are approximately 2.8 pieces per square foot of stone
- Stone weighs approximately 13 lbs per square foot
- Corners weigh approximately 14 lbs per linear foot
- There are three corner pieces per linear foot
- Installation requires 5.5 screws per square foot
- Screws are recommended to be #8 Galvanized (1.25" length) per our installation instructions

Drip Ledge Sill Information

- Each drip ledge flat piece is 20" long x 2.25" back height x 1.75" front height x 3" depth
 - Each drip ledge sill flat weighs 6 lbs
 - Drip ledge sill flats are typically sold by the piece: Simply measure the linear footage of ClipStone coverage when you are installing a wainscot, multiply by 12 and divide by 20 to convert to pieces
 - You will use 2 screws per drip ledge sill
- Each drip ledge sill corner is 8"x 8" in leg length, 2.25" back height, 1.75" front height with a 3" depth
 - Each drip ledge sill corner weighs 5 lbs
 - Drip ledge sill corners are ordered by the piece. Simply count the number of outside 90 degree corners on a job and order one piece for each outside corner. Standard ClipStone flats are installed at inside corner locations.
 - You will use 2 screws per drip ledge corner

ClipStone Sizing Specifications (con'd)

Universal Trim Stone

- Each ClipStone Universal Trim piece is 12" tall x 3" wide x 3" depth
 - Each Trim piece weighs 5 lbs
 - Trim pieces are ordered by the piece, simply count the linear footage you would need to install and that's how many pieces you will need
 - Each trim piece has built in brick ties so they can be fastened in most directions
 - Universal trim piece is perfect for wall calls, fireplaces, inside corners, window trim and door trim
 - You will use 2-4 screws per piece

Outlet Stones & Light Stones

- Each outlet stone is 6" wide x 8" tall with a centered opening for a standard sized gang box.
 - Each outlet stone weighs 3.25 lbs
 - Order one outlet stone for each standard sized gang outlet box on your project
 - You will need 4 screws per outlet stone
- Each light stone is 10" wide x 12" tall with a centered opening for a round outlet box
 - Each light stone weighs 12.70 lbs
 - Order one light stone for each larger light fixture on your project
 - You will use 4 screws per outlet stone

Hearth, Mantels & Corbels

- Hearths are available in a 20" x 20" size
 - Each Hearth is 36 pounds and is shipped in quantities of 36 per pallet.
 - Hearths are shipped on specialized 48" x 48" pallets
- Mantles are available in 5' x 12" size
 - Each Mantle is 59 lbs and is shipped in quantities of 18 per pallet.
 - Mantles are shipped on a specialized 67" x 48" pallet
- Corbels (Mantle mounting brackets) are packaged 12 EA per box
 - Each corbel is 10" tall, 6.5" long (where mantle sits) and 3.5" wide
 - You will need two Corbels for every Mantle that you install for weight support
 - Each Corbel weighs 10.42 lbs per piece and has prefabricated hanging supports so screws can be used to drill into substrate
