

#### Interior Frame Colours

#### **Exterior Frame Colours**

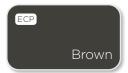

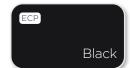

## ► Seals out the elements

Standard Features

Tri-Fin weatherstripping prevents drafts, dust and moisture from getting in.

#### ► Smooth operation

Spring balance system makes opening and closing single-hung windows easy; holds sash open at any height.

#### ► Energy-saving glass

Design Series windows are available with double and triple-glazing. Insulated glass units with LoĒ and argon can be tailored to your requirements.

#### ▶ Mbar Addition

Our Design Series of casement and direct set windows now include a vinyl Mullion Bar "Mbar" profile which is stronger than the previous "Tbar" profile. Allowing for common-frame configurations to attain structural ratings only achieved through steel-reinforced factory mulling, "Mbar" is a superior profile for the structural integrity of your windows.

#### **ECP ENHANCED COLOUR PROTECTION**

An innovative Kynar' coating helps protect our darker colours from fading and chalking. Colours are reproduced as accurately as printer technology allows.

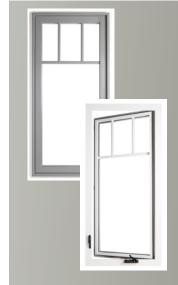

# A window for every view.

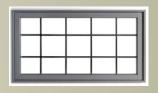

#### Single Hung

Single-hung windows have a fixed upper sash and a lower sash that slides vertically to allow ventilation. Popular for traditional homes.

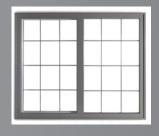

#### Casement

Casements are hinged on one side and crank open to catch the breeze. They have a contemporary look and are a popular choice over kitchen counters.

#### Awning

Awning windows are hinged at the top and open outward. Placed high on a wall, they provide light and ventilation while maintaining privacy. Placed below larger fixed windows, they provide ventilation and deflect light rain.

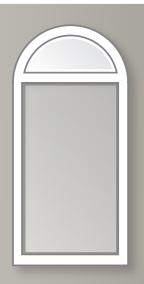

### Horizontal Slider

Horizontal sliding windows have one fixed sash and one sash that slides left or right. Popular for modern homes and where you don't want an open sash extending over a deck or patio.

#### Fixed Pane

Non-operating windows including picture windows and architectural shapes such as half-round, elliptical and trapezoid.

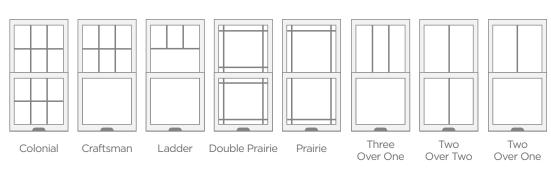

### Combinations

Shapes such as arch-top windows can be combined over standard windows to create a distinctive look. Multiple windows can also be combined to create panoramic views and connect a room to the outdoors.

**DESIGN SERIES WINDOWS** inspired by you.

# Accessories grilles, sdl's, hardware & jamb liners

### Grille Patterns & Colours

AVAILABLE SIZES	AVAILABLE COLOURS				
	White	Beige	Black	Brown	Grey
1" Flat Grille	•	•			
13/16" Flat Grille	•	•			
5/8" Flat Grille	•	•	•	•	•
5/16" Flat Grille	•	•	•		
1" Contour Grille	•	•	•	•	
<sup>3</sup> / <sub>4</sub> " Contour Grille	•	• /*	•/*	•/*	

#### In-Glass Grilles

These are installed between the glass panes. You'll never have to clean them.

<sup>\*</sup> Two-tone option available with white interior and beige, black or brown exterior. Colour always faces the exterior.

# Simulated Divided Lites (SDL)

These are installed on the outer glass surfaces to simulate the look of divided panes. Exterior and interior materials and colours are matched to your windows.

### Jamb Liners

Jamb liners (extension jambs) provide a clean transition between the window and interior trim. They cover the inside surface of the side jambs, the head jambs and sill. Available in vinyl, foam filled PVC, pine, oak or pre-primed wood in sizes to fit all wall depths.

A drywall return channel. which connects to drywall or plywood used as interior jamb on the window frame, is available in 1/2" and 3/4" sizes.

## Hardware

Casement and awning windows feature Truth Encore multi-point locks in 6 stylish colours.

# Glass & Glazing Options

### LoE Glass

What is LoĒ? Low emissivity (LoĒ) coatings are applied to glass surfaces to reduce the transfer of heat through the window. High solar gain LoĒ lets more of the sun's heat pass into a room. Low solar gain LoĒ blocks more of the sun's heat.

#### ECO GAIN 180

High Solar Gain Glass

A great choice for our northern climate because it allows solar energy to pass through the glass to provide "free heat" in winter. LoĒ reflects heat back into the room, reducing home heating needs. Throughout the year, Eco Glass Gain 180 protects furnishings from fading and insulates against extreme temperatures.

#### ECO SHIELD 270

Solar Control Glass

A good choice for variable climates. In summer, Eco Glass Shield 270 can reduce solar heat gain by 50% or more compared to ordinary glass. In winter, argon fill and LoĒ work together to maintain comfort and reduce energy needs. Throughout the year, Eco Glass Shield protects against fading without darkening your view.

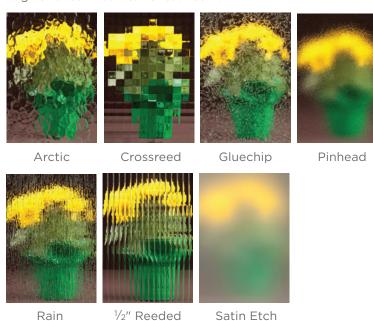

#### **ECO MAX SHIELD 366**

**Ultimate Performance Glass** 

This "spectrally selective" glass provides the highest level of comfort, energy savings and fade protection. Instead of one or two layers, the glass is coated with three layers of silver to block summer heat and retain your home's heat in winter – with no room-darkening tints and virtually no exterior reflectance.

#### Obscure Glass

Obscure textured glass ensures privacy while allowing sunlight to brighten a room. It's ideal for bathrooms.

### Preserve™ Protective Film

We help protect our windows and doors during transit and at the job site by applying a clear protective film on inner and outer glass surfaces. It

> eliminates masking and makes cleanup a snap. Simply peel it off to reveal spotless glass.

## NEAT® Glass

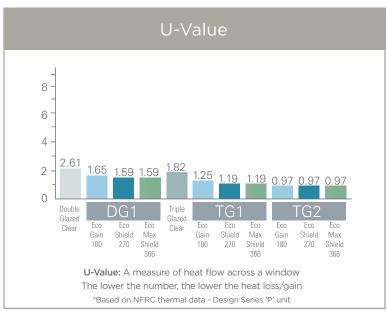

This special coating reacts with the sun's rays to loosen dirt so it rinses away when it rains. With NEAT, your windows will stay cleaner

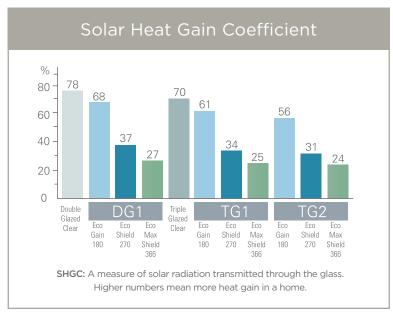

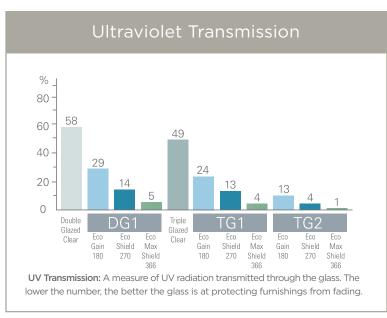

longer and be easier to clean. Available with Eco Shield and Max Shield glass.
